GET INTO IT - NOT OUT OF IT Ensure you hydrate constantly on all party pills. 500 ml of water or sports replacement drink per hour is ideal. For best results avoid excess alcohol. Party pills may cause elevated heart rate and short-term insomnia. Should not be used by people with any history or condition of heart or liver defect, high blood pressure or mental illness. Do not use if pregnant or lactating. Do not use in conjunction with medication or prescription drugs. Consult a medical professional if in doubt. In general, don't exceed one dose of any party pills per week. The more and closer your food intake to consuming any legal highs will diminish its effect. It is generally good to have a small meal 2-3 hours before consumption.
